

... The Jack You Need is A Jack Like This

No. 819—Single lift hydraulic type. Lifts with but slight pressure on the long handle. Balanced for easy positioning. \$7.50

No. 635 and No. 649—Double lift pressed steel types. Two low-built models—extremely high lifts. Price . . . \$2.75 and \$3.00

WALKER Hydraulics represent the utmost in car lifting ease—the luxury of almost effortless operation. They are the answer to easy tire changing because of their lifting range—long handle—capacity to lift your car safely and easily—cap that grips firmly—and a broad substantial base that insures a firm lifting foundation. There are five models that cover every need for light cars up to heavy trucks and buses.

The Walker Hydraulic Jack handle locks to the jack, and is centered to give the jack perfect balance when positioning. Short easy handle strokes raise the car—and by pushing in and down on the handle you lower the jack.

WALKER MANUFACTURING COMPANY, RACINE, WISCONSIN

Walker also makes a complete line of mechanical and hydraulic jacks for trucks, buses, garages and all types of service stations

(All prices slightly higher west of Denver and in Canada)

A safety release valve prevents damage to the jack if overloaded. The piston chamber and pump cylinders are polished by honing to prevent wear of cup washers (the vital parts of the jack), thus insuring long life and continued service.

A Walker dealer will show you the hydraulics as well as the various other types of Walker Jacks that fit your car. They're all Walker quality—from the luxurious hydraulics down to the lower priced ratchet types. The price you pay depends upon the size of your car and the degree of lifting ease you want. Walker Jacks have a national distribution among accessory dealers—but if your dealer does not sell Walkers, write us.

No. 525—Double extension screw type. 4-foot handle and easy operation. Price \$6.85. No. 520, No. 515, for smaller cars, \$5.00, \$4.00

No. 601—Pressed steel type with foot lift to handle the low-built cars with balloon tires flat. \$2.70
